

CONTENTS

Preface

1 Kinetic Theory

Part One Chemical Kinetics

2 Chemical Reactions

3 Equilibrium

4 Rate and Order of Reaction

5 Methods of Calculation of Rate of Reactions

6 Procedure for Studying Rate of Reactions

7 Ways to Measure Rate of Reactions

8 Determination of the Mechanism of the None

9 Effect of Temperature on the Rate of Reaction

10 Effect of Catalysis on the Rate of Reaction

11 Surface Adsorption

12 Chemical Kinetic Problems

Part Two Transfer Kinetics

13 Diffusion Phenomenon

14 Calculation of the Amount of Diffusion

- 25 Electrochemical Reactions in Phase Boundaries**
- 26 Nucleation Phenomenon**
- 27 Growth Phenomenon**
- 28 Gas-Solid and Gas-Liquid Reactions**
- 29 Reduction of Iron Ore**
- 30 Rate Phenomenon in the Steelmaking Process**
- 31 Steel Degasification Processes**
- 32 Combined - Kinetics Problems**

Part Four Appendices

- a- Abbreviations**
- b- Definition of Terms**
- c- Reaction Rate Equations**
- d- Solution to 2nd Fick's Equation for Geometries**
